

## CHAPTER 1

# Getting Started

- 1.1 The AutoCAD Interface Elements
- 1.2 Create a New Drawing
- 1.3 About Coordinate Entry
- 1.4 Dynamic Input and Object Snaps
- 1.5 2D Isometric Drawing

## CHAPTER 2

# Linear and Curved Objects

- 2.1 Drawing Linear Objects 51
- 2.2 Draw Curved Objects 74
- 2.3 Work with Reference Points 92
- 2.4 Hatching and Shading Regions 99

## CHAPTER 3

# Select and Modify Objects

- 3.1 Selecting Objects 108
- 3.2 Editing with Grips 114
- 3.3 Move, Rotate, and Align Objects 121
- 3.4 Offset and Mirror Objects 126
- 3.5 Trim, Extend, and Fillet Objects 135
- 3.6 Chamfer, Break, and Join Objects 142

## CHAPTER 4

# Arrays and Blocks

- 4.1 Create the Rectangular Arrays 149
- 4.2 Create the Polar Arrays 155
- 4.3 Create the Path Arrays 159
- 4.4 Create and Insert the Blocks 165
- 4.5 Divide and Measure Blocks 169
- 4.6 Create the External Blocks 172
- 4.7 Using the External References 174
