

Cordyceps is a fungus-caterpillar complex which is one of the most valuable Natural Medicine today. It can give many beneficial effects to our body especially in patients with the following medical problems;

- Various forms of cancer especially leukaemia
- Hyperlipidaemia
- Hypertension
- Ischemic heart disease
- Diabetes mellitus
- Bronchial asthma and other forms of COPD
- Chronic hepatitis B
- Cirrhosis of liver
- Impotency
- Chronic kidney diseases

Medical scientists around the world have been trying to discover the scientific evidence behind such benefits. Currently scientists have already isolated a molecule known as Cordycepin that is responsible for the most of its medicinal properties.

***Cordyceps sinensis* (Berk.) Sacc.**

1. What is Cordyceps?	1	8.10. Effects on the kidneys	52
1.1. Naming	1	8.11. Effects on the liver	59
1.2. Distribution	2	8.12. Effects on diabetes mellitus	61
1.3. Life cycle of Cordyceps	3	8.13. Effects on the immune system	63
1.4. The best time to harvest	7	8.14. Effects on the nervous system	68
1.5. Morphological characters of <i>Cordyceps sinensis</i>	8	6. Indications	68
1.6. Microscopical characters of <i>Cordyceps sinensis</i>	9	6.1. Reproductive system	70
1.7. Identification of <i>Cordyceps sinensis</i> powder	11	6.2. Prevention and treatment of cancers	70
1.8. Microscopical characters of <i>C. sinensis</i> powder	11	6.3. Hyperlipidaemia	70
2. Natural vs fermented Cordyceps	12	6.4. Respiratory disorders	70
2.1. Cultured Cs-4 strain	14	6.5. Renal disorders	71
2.2. Other strains of cultured Cordyceps	15	6.6. Cardiovascular system	71
3. Traditional Uses	15	6.7. Liver disorders	71
4. Chemical constituents	16	6.8. Immune system	72
4.1. Cordycepin	17	6.9. Diabetes mellitus	72
5. Pharmacological action	18	6.10. Physical performance	72
5.1. Antioxidant activity	18	7. Dosing	72
5.2. Anti-inflammatory activity	20	7.1. Adult (18 years and older)	72
5.3. Antiplatelet activity	21	7.2. Children (younger than 18 years)	73
5.4. Anticancer effect	22	8. Safety	73
5.5. Effects on sexual functions	30	9. Side effects	75
5.6. Improved physical performance	35	10. Precaution	76
5.7. Effects on lipid metabolism	38	11. Interactions	76
5.8. Effects on cardiovascular system	40	12. Conclusion	77
5.9. Effects on respiratory system	48	13. References	78
