

The introduction by the author

There will soon be internal and external tourist will come to Mogok. At that time the essential thing for tourists is the guide book to Mogok.

I intentionally write this book in which the tourists should get the information concerning with the Mogok and its environs. On the other hand this guide book can be used as tourists' manual. All the facts in this guide book contain the belief and dialect of the local residences. I would like to tell you the differences and changes in gem markets and trading centres. Some of the pagodas are recently renovated and some are beyond repair. Some were erased by time and weather. I compile this guide book as it is in current period of time. This guide book is not a new one I refer and refill the facts from the guide books I have written and if you want to know greater knowledge about the town of Mogok, may I suggest you to read my former guide books also.
